

2018 Fall Summit - Agenda
October 16, 2018
State Auto, Gahanna, OH

Speaker	Time	Presentation
Alice Kaltenmark President CPO	10:00 -10:15 am	Welcome
Kathy Nagy	10:15 – 11:00 am	<p>Business Continuity Planning between Industries</p> <p>Differences and similarities in Business Continuity planning between the financial services, insurance and manufacturing industries.</p>
Apolonio “Apps” Garcia CEO, HealthGuard	11:15 -noon	<p>Improving Risk Management Decision Making</p> <p>Effective risk management is largely dependent on an individual's or organization's ability to do three things: identify issues, make decisions on what to do about those issues with the best available information, then execute those decisions. While this may seem fairly simple, history is filled with individuals and organizations that failed, at great cost, at one or more of these three areas. This talk will explore some of the common risk management decision making pitfalls individuals and organization's face, and provide suggestions on what attendees can do to avoid them.</p>
	Noon – 1:00	Lunch
Alice Kaltenmark	1:00-1:40	<p>Around the Room Business Meeting</p>
Ted Brown KETCHConsulting	1:50 – 2:40	<p>Disaster Relief – Personal, Community and Business</p> <p>Ted will share insights gleaned from his experiences in providing critical help to the US Virgin Islands after a major hurricane crippled the island infrastructure and economy. Ted will then extend these insights to the recent devastation experienced in Puerto Rico and other major natural disasters in the contiguous 48. It really is a back-to-basics key lessons learned that apply across all regions and localities (private/public sector, communities and personal preparedness).</p>
Edward Slusarski Dir of IT Audit & Cybersecurity, NACCO Industries	2:55 – 3:40	<p>Cyber Security, Regulatory Issues</p> <p>The current cybersecurity requirements (by themselves) can drive an organization crazy with trying to comply with all of the nuances. Add in a number of pending US and International laws, regulations, requirements to the mix and the focus and direction of the organization becomes overwhelming to all parties involved (Finance, Operations, IT, Legal, HR). Current technology adoption and use (IoT, AI –</p>
