

## 2021 CPO Fall Agenda

Name	Email	Session Title	Session Summary
Steve Linder	Steve.linder@castellanb.com	Things to Know Before Choosing a Recovery Strategy	When it's time to develop a recovery strategy, there are significant things to know in order to ensure success. This presentation discusses the different types of strategies, who to engage when defining and choosing a strategy, and what are the important steps to consider during its development.
Connie Matthews	cmatthews@reynconsecurity.com	The Evolving Cyber Security Landscape – What do companies need to think about and do to be better prepared.	<p>The Cyber landscape is ever changing and evolving. This talk will discuss the importance of training and developing your teams from end users to practitioners in the security field.</p> <p>With the uptick of security incidents and ransomware attacks, training and having tabletop exercises continues to be critical for companies to be prepared and ready to attack this problem head on!</p>
John Kappesser	John.Kappesser@Duke-Energy.com	Adapting Building Evacuations through Technology	I will be physically at the meeting. I will introduce members of the Cooper Lighting team who will be virtual. They will present new technology that allows for Building Management to track and identify employee locations which can be used to save time and effort during an emergency evacuation. The technology also allows companies to better manage security and facilities/HVAC issues. I will then summarize what we are trying to do at Duke Energy and allow time for me or the Cooper Team to answer questions.
Rob Carter Jay Haller	rcarter@recoverypoint.com jhaller@mvpgroup.biz	Availability versus Recovery – how to automate and metric your DR/BCP Program	Do you know what your real RTO is and are you measuring it correctly? Managed services providers and traditional testing strategies often promise an RTO but when a disaster hits, business users and customers expect availability! In this session, learn how to implement and achieve real DR/BCP availability across applications and business lines utilizing Resiliency Process software automation/AI tools and an Availability Metrics methodology. Recovery Point Solutions has teamed up with The MVP Group for this session.
